SUMMARY

Frontend engineer with 4+ years building production software across fintech, enterprise, and healthcare — from regulated digital-banking apps in Flutter to SharePoint Framework solutions in React and TypeScript for a Microsoft Solutions Partner. Now applies that same engineering discipline to motion-led web: GSAP scroll systems, Framer Motion, and Three.js. Works at the seam between design intent and production code — component architecture, state management, performance budgets, and the last ten percent of polish that separates a shipped page from a memorable one.

CORE SKILLS

Frontend React, Next.js, TypeScript, JavaScript (ES6+), Redux, Context API, Tailwind CSS, SCSS, responsive & accessible UI

Creative Development GSAP + ScrollTrigger, Framer Motion, Three.js, SVG animation, Spline, scroll-driven interfaces, 60fps motion tuning

Mobile Flutter, Dart, Riverpod, Provider, Clean Architecture (MVVM), iOS & Android release pipelines

Enterprise & Integration SharePoint Framework (SPFx), PnP.js, Microsoft 365, REST API design & integration, auth flows

Architecture & Performance Design systems, typed component libraries, code splitting, lazy loading, Lighthouse & bundle optimization

Tools Git, Figma, Vercel, VS Code, Chrome DevTools, CI/CD, Shopify

EXPERIENCE

Al Rafay Consulting — Senior Frontend Developer

Karachi, Pakistan · Sep 2024 – May 2026

- Engineered enterprise SharePoint Framework (SPFx) web parts in React and TypeScript for a Microsoft Solutions Partner, integrating Microsoft 365 and SharePoint data through PnP.js across client organizations.
- Built reusable, typed component libraries from Figma design systems — replacing per-project one-offs with shared patterns new modules could assemble from.
- Cut initial load on data-heavy dashboards through route-level code splitting, lazy loading, and render profiling, eliminating re-render bottlenecks surfaced in React DevTools.
- Defined REST contracts with backend leads ahead of implementation, letting frontend and backend build in parallel instead of serialising on integration.

Codebase Technologies — Frontend Developer (Flutter)

Karachi, Pakistan · Feb 2022 – Sep 2024

- Shipped core features for regulated digital-banking products — Raqami, WINK Pay, and AAA Financing — in Flutter across iOS and Android.
- Implemented Clean Architecture (MVVM) with Riverpod and Provider, establishing state-management and module conventions the team reused across subsequent features.
- Integrated secure REST APIs for onboarding, KYC, and transaction flows — hardening error, retry, and timeout handling in journeys where a failed state carries regulatory consequences.
- Translated high-fidelity Figma systems into pixel-accurate, responsive UI across phone and tablet breakpoints on both platforms.

SELECTED WORK

Shilajit Energy Drink · Next.js, GSAP, Three.js, Tailwind · Self-directed concept revamp. Dark, high-contrast brand site with 3D accents and scroll-driven ingredient storytelling.

Dari Mooch · Next.js, GSAP, Shopify, Tailwind · Self-directed concept revamp. Cinematic grooming-brand storefront built around a scroll-timeline product narrative.

Elyscents · Next.js, Framer Motion, Shopify, Tailwind · Self-directed concept revamp. Fragrance e-commerce experience built around atmosphere, pacing, and motion.

EDUCATION

BS, Computer Science — Iqra University, Karachi, Pakistan
